SUMMARY

Full Stack developer passionate about creating innovative web solutions. I discovered programming as my true calling during 2020 confinement, transforming a hobby into my professional path. Specialized in the JavaScript and React ecosystem, with proven experience in creating scalable applications with modern architectures.

PROFESSIONAL EXPERIENCE

- Alticsa

Jan 2025 - Apr 2025

 - I led the integral development of a web platform for the health sector, implementing a modular frontend architecture to ensure scalability and maintainability.
 - I managed frontend deployment, security and performance while developing robust backend APIs with NestJS.
 - I optimized client-server communication to ensure optimal performance and deliver a smooth user experience.
- NHL

Oct 2024 - Dec 2024

 - I developed and optimized functionalities in web applications using PHP, with a focus on efficiency.
 - I implemented responsive UI components compatible across multiple browsers and devices, along with efficient CRUD systems in SQL.
 - I performed code refactorings that significantly improved overall application stability and performance.

PROJECTS

- Sym Medical App

 - Developed healthcare platform managing exams, lab results, appointments, billing and contracts.
 - Implemented statistical analysis and treatment tracking features for enhanced operations.
 - Integrated financial control systems to optimize medical center performance.
- Elite

 - Designed and developed an e-commerce platform that optimizes operations for an online clothing store.
 - The solution manages inventory, orders, payments, customer data, shipping and support.
 - Delivered an efficient and complete shopping experience for users.
